School Device Program

Digital technologies are an important part of our learning environment and it is our expectation that all students in years 7 to 12 have a laptop to support their learning. We have made some changes to our current processes to support better access to IT, ensure consistent devices for students and also provide more equitable and affordable options for families.

We are adopting the department's Digital Strategy which will enable families with students in years 7 and 10 to purchase laptops through the department's portal and also provide students who are eligible for School Card, laptops for long term loan.

If your child is in years 8, 9, 11 and 12 and requires a new laptop, we would ask that you source the same computer we are purchasing through the department to support our aim for consistency across the school.

Recommended devices:

HP ProBook 445 G11 (AMD Ryzen 5/16GB/256GB/W11P)

HP ProBook 445 G11 Touchscreen: (AMD Ryzen R5 7535U/16GB/256GB/W11P)

HP ProBook 435 x360 G10 (AMD Ryzen 5/16GB/256GB/W11P)

We are committed to rolling out this initiative slowly and recognise that some students already have devices, so do not require families to purchase a new device if their current laptop is in good working condition.

Please contact the school for further information or support.
